Checkpoint®

Universal AutoPeg - Brief Info

❑ Checkpoint's largest, most versatile AutoPeg solution allows retailers to expand their loss prevention strategy : store-wide protection on a diverse range of merchandise to be securely displayed on peg hooks.

❑ The solution features the convenient one-pin attachment, with a bright yellow design and Checkpoint's trademarked black lock to deter potential thieves.

❑ The latest addition to the AutoPeg range features a wider mouth and enhanced internal mechanism, offering protection for merchandise of varying sizes.

❑ The new design not only means it can clamp onto larger items, but it is more resilient due to the more robust design.

❑ It works with all types of detacher, allowing store staff to easily remove it at the Point of Sale.

Checkpoint®
